

I am taking the time to voice my opinion in regards to House Bill 6818. This is another tax being added to the already high tax burden put on the people of Ct. Where does this all end? You keep taxing us and wasting the money you get. Were we not promised that if we allowed a state income tax we would not continue to be burdened further and we would not run a deficit? The answer is not to continue to add tax after tax. It is to learn how to live within your means and to save and spend wisely, which apparently you refuse to learn. If we as responsible individuals must do this in our own families, why should we expect any less from you? Vote no on this bill!
Enough already on the taxes - people are leaving this state because they can't afford to live here.

Sincerely,
Christine Boyer
